Target User: Customer Support Executive / Content Creator / Organization User

1. SAYS

- “Customers ask the same questions repeatedly.”
- “Finding the correct answer takes time.”
- “Creating FAQs manually is difficult.”
- “We need updated and organized information.”
- “I want quick access to frequently asked questions.”

2. THINKS

- “Can I find the required answer quickly?”
- “How can I reduce repetitive support work?”
- “Can AI help generate FAQs?”
- “How can we keep FAQ information organized?”
- “Is customer information secure?”

3. DOES

- Answers customer questions.
- Searches existing documents and FAQs.
- Creates and updates FAQ content.
- Categorizes support information.
- Repeats answers to similar questions.
- Shares information with customers.

4. FEELS

- Frustrated by repetitive questions.
- Overwhelmed by large amounts of support information.
- Concerned about outdated information.
- Wants faster and easier access to answers.
- Wants a secure and reliable support system.

5. PAINS

- Repetitive customer questions.
- Time-consuming manual FAQ creation.
- Difficulty finding relevant information.
- Outdated or scattered documentation.
- Lack of centralized FAQ management.
- Security concerns for private information.

6. GAINS

- Faster answers.
- Automated FAQ generation.
- Easy FAQ search.
- Centralized information.
- Better organization through categories.
- Secure user access.
- Reduced repetitive support work.
- Improved customer-support efficiency.

USER NEED

The user needs a secure and centralized system that can quickly generate, manage, search and provide useful answers to frequently asked questions.

INSIGHT

By understanding the difficulties faced by customer support teams, the team identified an opportunity to use AI, search, authentication and centralized FAQ management to reduce repetitive work and improve access to support information.

PROPOSED SOLUTION

AnswerBot provides AI-assisted FAQ generation, FAQ management, search functionality, authentication and organized knowledge storage through a centralized backend system.
