Date: 29 September 2026

Scenario: A customer support executive receives a question and needs to find or create the correct FAQ answer.

Stage	User Action	Problem / Feeling	AnswerBot Support
1. Receive Question	Receives a customer query.	Needs a quick and accurate answer.	Identify key terms from the question.
2. Search	Searches existing FAQs.	Manual searching can take time.	Keyword/semantic FAQ search provides relevant results.
3. Review	Checks suggested FAQ and answer.	Concern about accuracy or outdated information.	User reviews the stored answer before sharing.
4. Generate	If no suitable FAQ exists, requests AI generation.	Creating an answer manually takes time.	Gemini AI generates a draft FAQ.
5. Edit & Save	Reviews, edits and saves the FAQ.	Needs control over final content.	CRUD operations allow editing and secure storage.
6. Respond	Uses the final answer for the customer.	Needs consistency and speed.	Centralized FAQ becomes reusable.

Journey Outcome

The user moves from receiving a repetitive question to finding or generating a useful answer through one centralized workflow. The system reduces repeated manual work while allowing the user to review and control the final content.

Key Experience Requirements

- Fast search.
- Clear results.
- AI assistance when an answer is unavailable.
- Simple editing and saving.
- Secure authentication and role-based access.
- Reusable centralized FAQ knowledge.
