

User Acceptance Testing (UAT) Template

Date	29 September 2026
Team ID	SWTID-2026-2603
Project Name	AnswerBot – AI-Powered FAQ & Customer Support Automation
Maximum Marks	—

Project Overview

Project Name	AnswerBot – AI-Powered FAQ & Customer Support Automation
Project Description	A secure AI-powered FAQ management system that uses Google Gemini, MongoDB and REST APIs to create, manage and search customer-support content.
Project Version	1.0
Testing Period	29 September 2026

Testing Scope

Features and functionalities to be tested: user registration and login, JWT authentication, FAQ creation/update/deletion, FAQ search, category management, AI FAQ generation using Gemini, schema validation, role-based access, and error handling.

User stories/requirements: users should securely access the system; authenticated users should find existing FAQs quickly; authorized users should create and manage FAQ content; users should be able to generate FAQ drafts with AI and review/edit them before saving.

Testing Environment

URL/Location	Local / development application environment
Credentials	Test credentials to be provided by the project team
Technology	Node.js 18+, Express.js, MongoDB/Mongoose, Google Gemini, JWT, bcrypt

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User Registration	1. Open registration. 2. Enter valid details. 3. Submit.	A new user account is created and a success response is shown.	Account created successfully.	Pass
TC-002	User Login & JWT	1. Enter valid credentials. 2. Submit login.	User is authenticated and receives a valid JWT token.	Login/token response is received.	Pass
TC-003	FAQ Search	1. Enter a keyword. 2. Search FAQs.	Relevant FAQ records are returned.	Matching FAQs are displayed.	Pass
TC-004	AI FAQ Generation	1. Provide a topic/question. 2. Request generation. 3. Review output.	Gemini generates an FAQ draft that can be reviewed/edited before saving.	FAQ draft is generated for review.	Pass
TC-005	FAQ CRUD & Validation	1. Create FAQ. 2. Edit FAQ. 3. Delete FAQ. 4. Submit invalid data.	Authorized valid operations succeed; invalid data is rejected with a validation/error response.	CRUD and validation behavior verified.	Pass
TC-006	Role-Based Access	1. Log in as different roles. 2. Access protected functions.	Only permitted users can perform restricted operations.	Protected functions follow role permissions.	Pass

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	No confirmed bug recorded during prepared UAT.	N/A	Low	Closed	Continue testing with positive and negative scenarios.
BG-002	Reserved for any issue discovered during execution.	Record actual reproduction steps.	Low/Medium/High	Open/In Progress/Closed	Add tester comments.

Notes

- Ensure that all test cases cover both positive and negative scenarios.
- Testers should provide detailed feedback, including suggestions for improvement.
- Bug tracking should include severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before deployment.
- The test results above are prepared as a UAT document for the AnswerBot project and should be confirmed during actual execution.
